Computer Science – Helpful Information

CS Undergraduate Contacts:
- Worthy Martin, Interim Director of BACS Program: martin@virginia.edu
- Jim Cohoon, Director of BSCS Program and CS Minor: jpc@virginia.edu
- Jai Maupin, Undergraduate Program Coordinator: jm3xe@virginia.edu
- Natalie Edwards, Computer Engineering Program Coordinator: nae5c@virginia.edu

Bachelor of Arts in Computer Science (BACS):
- This degree is an interdisciplinary degree with the College of Arts & Sciences (A&S).
- Students typically apply in the spring semester of their second year.
- In order to apply for the major, students must complete the following pre-requisites:
  - An introductory computer science course, such as: CS 1110, 1111, 1112, 1113 or CS 1120, with a grade of C+ or higher. This requirement is waived with AP or IB credit, or by passing CS placement test.
  - CS 2110, Software Development Methods, or an equivalent course, with a grade of C+ or higher. Passing the CS 2110 placement test does not offer course credit. Students will be required to take some other CS course at UVA in lieu of CS 2110.

Bachelor of Science in Computer Science (BSCS):
- This degree is with the School of Engineering & Applied Science (SEAS).
- All first-year Engineering students choose their major in the spring semester of their first year.
- First Year Students seeking the BSCS major will submit their application information as part of the normal first-year SEAS major declaration process, which the SEAS Dean's office manages.
- Individuals who want to choose BSCS as a second major, or change majors after their first year must apply to the major. It is strongly suggested for these students to be enrolled in CS 2150 (or to have already completed CS 2150 with a grade of C+ or better), in addition to have taken one introductory computer science course (either CS 1110, CS 1111, CS 1112, CS1113, CS111X) with a grade of C+ or better, and to have taken CS 2110 and CS 2102 with a grade of C+ or better.

Bachelor of Science in Computer Engineering (BSCpE):
- This degree is with the School of Engineering & Applied Science (SEAS).
- All first-year Engineering students choose their major in the spring semester of their first year.
- Students seeking the BSCpE major will submit their application information as part of the normal first-year SEAS major declaration process, which the SEAS Dean's office manages.

CS Minor:
- At this time the university is only able to allow a limited number of SEAS students to declare the CS Minor.
- Students in other schools, who complete all of the requirements for the minor, are able to submit the minor request at the beginning of the semester in which they will compete the requirements.
- In order to apply for the minor, students must have already completed CS 2150 with a grade of C+ or better (or be currently enrolled in CS 2150). The normal deadline is March 1. Applicants who have already completed CS 2150 will be notified if they have been accepted as a CS minor by April 1. Applicants who are currently enrolled in CS 2150 will be notified if they have been accepted as a CS minor by June 1.

Placement Testing:
- Placement testing for CS 1110 & CS 2110 is offered for a brief period of time in the first couple of weeks of each semester, and during course enrollment. Students should refer to the CS 1110 and CS 2110 web pages regarding specific rules / deadlines: http://ugrads.cs.virginia.edu/
- Students with a passing placement test for CS 1110 will have fulfilled this pre-requisite. Students with a passing placement test for CS 2110 will need to take some other UVA CS course to make up the credits, as the placement test does not offer course credit.
